El primer paso es el más importante en una travesía.

ESTABLECE UNA DIRECCIÓN Y LO LLEVA A UN DESTINO.

Lo mismo puede decirse del camino a su jubilación. Al tomar parte en el plan de jubilación que ofrece su compañía, está tomando el primer paso.

Al inscribirse en el Plan, usted dará un paso más hacia su objetivo de jubilación.

ADP, Inc. es propietaria y administradora del sitio de Internet ADP.com y de la aplicación ADP Mobile Solutions App.

Evalué los cargos y gastos que debe pagar, incluyendo los cargos relacionados con la transferencia de su cuenta, para confirmar si la transferencia de fondos a una cuenta IRA o la consolidación de sus cuentas lo ayuda a reducir costos. Los planes de jubilación patrocinados por un empleador podrían tener ciertas ventajas tales como el acceso a fondos, inversiones elegidas por la firma fiduciaria y otras protecciones ERISA no disponibles para otros inversionistas. Para tomar la decisión de transferir fondos de un plan de jubilación, considere si la transferencia de activos cambia ciertas ventajas que usted considere importantes.

Conéctese con la aplicación ADP Mobile Solutions

Inicie el camino a su jubilación con la aplicación ADP Mobile Solutions. Esta aplicación le permite entrar y gestionar rápidamente su cuenta de jubilación. Descárguela ahora en [Apple App Store](#) o en [Google Play](#) para tener acceso rápido y fácil a:

Tómese tiempo para planear su futuro económico.

HE AQUÍ POR QUÉ.

Muchos profesionales financieros estiman que para vivir cómodamente en la jubilación, usted necesitaría entre 70 a 80 por ciento de sus ingresos antes de jubilarse. El Seguro Social puede reemplazar el 27% de sus ingresos de prejubilación a los 67 años.¹ El resto de los ingresos deben de provenir de **usted** mismo.

Invierta en usted y ahorre para la jubilación

El plan de jubilación de su compañía es uno de los pocos programas diseñados para ayudar a cubrir la diferencia que proporcionará el Seguro Social y los ingresos que necesitará durante la jubilación. Los aportes al plan de jubilación se descontarán automáticamente de su salario, por lo que ni siquiera tiene que pensar en ello.

Aproveche al máximo sus aportes al plan

Usted puede elegir hacer aportes al Plan antes de impuestos y/o de la manera Roth 401(k). En la tabla siguiente se indican las diferencias entre los dos tipos de aportes. Para obtener más información sobre tipos y límites de aportes consulte la sección de **Aportes** en la descripción de las Características de Su Plan.

	APORTES ANTES DE IMPUESTOS	APORTES ROTH 401(k)
Aportes del empleado	Realizados antes de descontar impuestos de su salario.	Realizados después de descontar impuestos de su salario.
Ganancias en la cuenta	Impuestos diferidos hasta la distribución de fondos.	Distribución de fondos libre de impuestos en distribuciones calificadas.
Impuestos federales	Reduce la cantidad sobre la que se paga impuestos, basado en la cantidad que aporte. Paga impuestos al retirar los fondos, tanto en los aportes como en las ganancias.	Se paga impuestos en el aporte durante el año en curso. Distribución de fondos libre de impuestos en distribuciones calificadas.
Distribuciones	Disponible de acuerdo con las reglas del Plan.	Libre de impuestos si tuvo la cuenta Roth 401(k) al menos por cinco años y es mayor de 59½ o si es discapacitado o en caso de fallecimiento.

El alto costo de la inflación

Tal como se indica a continuación, no importa su edad ni su generación, la inflación ha afectado el costo de muchos productos comunes.

	 Entrada a un concierto ²	 Teléfono celular ³	 Vivienda ⁴
2000s	\$50	\$600	\$119,600
Hoy	\$90+	\$999	\$293,349

Qué significa para su economía

Una tasa de inflación del 4% podría parecer insignificante, hasta que usted calcula el efecto que tendrá en su poder adquisitivo a largo plazo. Por ejemplo, en sólo 20 años, una tasa de inflación del 4% anual reduce el valor de cada dólar a \$0.46.

También puede evaluarlo desde otro punto de vista. Para el año 2045, el precio que usted pagaría por asistir a un concierto, por un nuevo teléfono celular o por una vivienda sería considerablemente mayor. En el siguiente cuadro podemos apreciar la proyección de precios con una tasa del 4% de inflación.

	 Entrada a un concierto ²	 Teléfono celular ³	 Vivienda ⁴
2045 ⁵	\$222	\$2,462	\$723,022

2 Datos de entradas a conciertos obtenidos de aarp.com.

3 Datos de teléfonos celulares obtenidos de ooma.com y apple.com.

4 Datos de viviendas nuevas obtenidos de CNBC.com y fool.com.

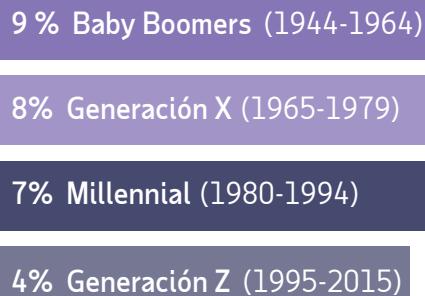

5 La proyección de precios se ofrece como dato ilustrativo únicamente y están basados en una tasa de inflación del 4%. La tasa de inflación real podría variar y ello afectaría el costo de los productos y servicios indicados como ejemplo.

Haga del ahorro para la jubilación una prioridad

Cada generación define la jubilación diferente. Sea cual sea su definición, en lo referente a la jubilación, cada generación piensa que para ellos será más difícil alcanzar la seguridad económica a la edad de jubilarse que para sus padres.

La gráfica de la derecha indica el aporte promedio individual a un plan de jubilación, por generación.

EL AHORRO POR GENERACIÓN³

Tan solo \$5 por día puede hacer una diferencia

¿Sabía usted que el 41% de los estadounidenses gasta hoy más en café que en ahorrar para el futuro?⁷ Veamos qué resultado daría ahorrar \$5 por día (\$35 por semana).

**Usted podría ahorrar
\$304,171 en 40 años.**

8 Debe evaluar su capacidad de ahorro teniendo en cuenta una caída prolongada del mercado, gastos inesperados o una emergencia imprevisible. Únicamente con fines ilustrativos. Se supone un saldo inicial de \$0, un aporte semanal de \$35, un retorno anual del 6% compuesto diariamente, la reinversión de las ganancias y sin retiro de dinero ni préstamos. Los resultados expuestos no representan resultados reales pasados ni futuros de ningún instrumento específico de inversión. Tanto el retorno de inversión como el capital pueden fluctuar y en el momento del retiro la inversión podría valer más o menos que su valor original.

AHORRE POR 30 AÑOS

■ Aportes

Es un ejemplo ilustrativo; los resultados podrían variar. Las inversiones no son el reflejo de ningún fondo determinado incluido en su plan. Se supone un saldo inicial de \$0, un aporte semanal de \$35, un retorno anual del 6% compuesto diariamente, la reinversión de las ganancias y sin retiro de dinero ni préstamos. Una estrategia de ahorro sistemático no garantiza ganancias ni evita pérdidas en períodos de baja del mercado de valores.

Elija un camino para sus finanzas

Varios caminos pueden conducirlo a un mismo destino. El que usted elija dependerá de su situación personal. La planificación de la jubilación es lo mismo: usted invierte para llegar a un objetivo.

Las decisiones sobre inversiones deben fundamentarse en:

- Estilo de vida y personalidad
- Tolerancia al riesgo
- Consideraciones de salud
- Edad en la que piensa jubilarse

Para ayudarlo a determinar su perfil de inversionista y tolerancia al riesgo puede consultar el cuestionario de Perfil de Inversionista.

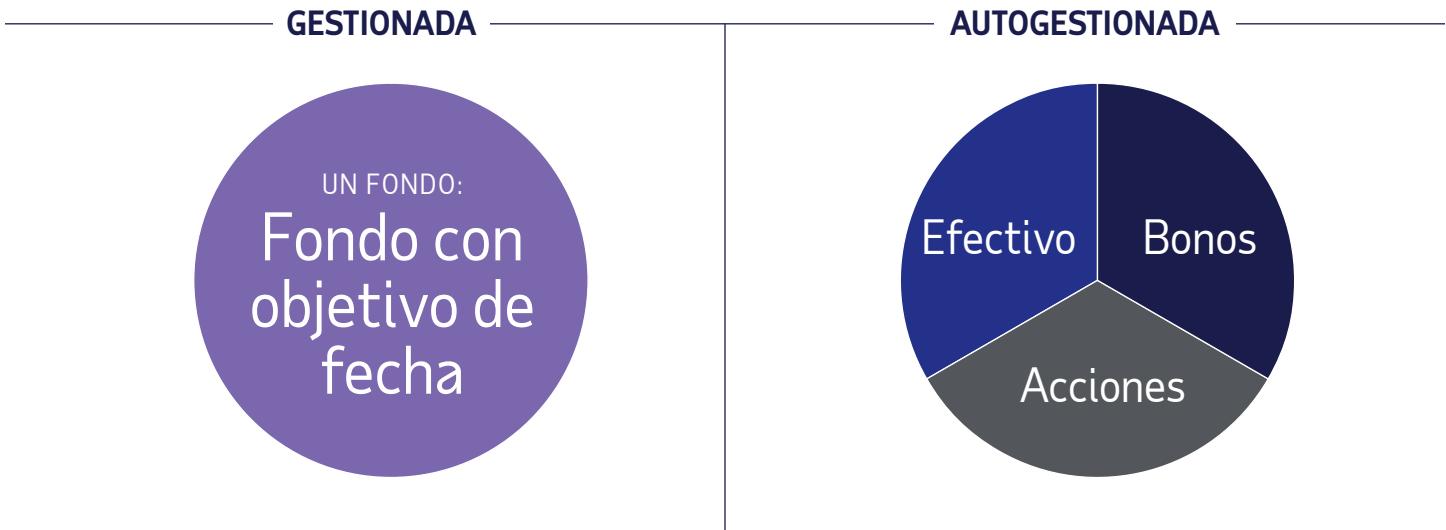

Para ello lea el código QR con su cámara u otro lector de códigos, o [haga clic aquí](#).

[VIEW QUESTIONNAIRE](#)

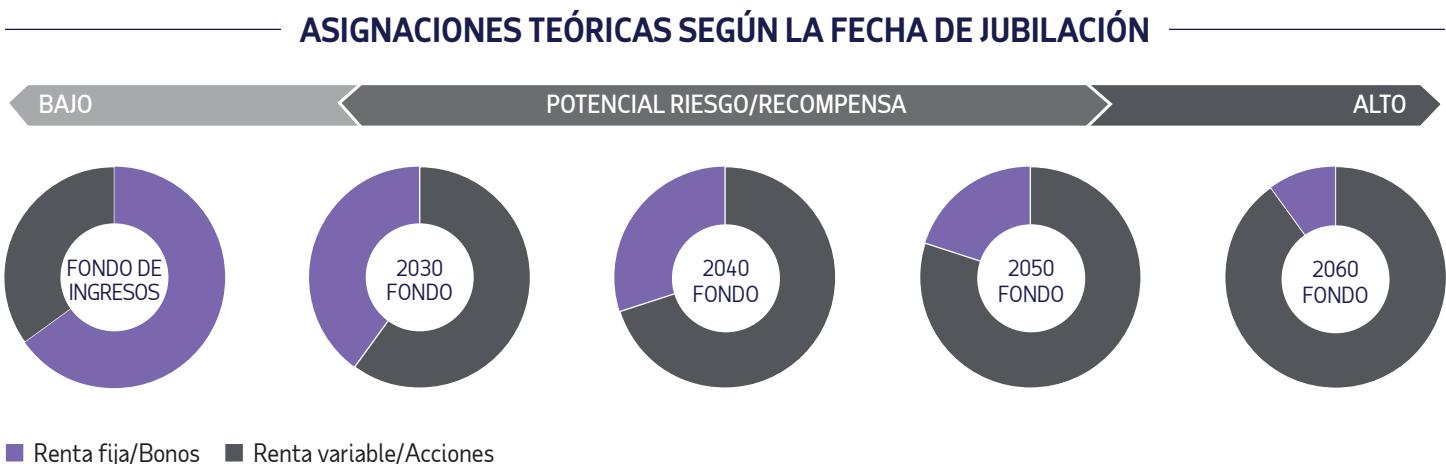

El camino de sus finanzas

Como parte de su planificación, usted puede elegir en invertir en el fondo con objetivo de fecha basado en la fecha que usted quiera jubilarse o puede crear y gestionar su propia cartera de inversiones para la jubilación con las inversiones ofrecidas por el Plan.

Fondos con objetivo de fecha

Cada uno de estos fondos se administra considerando el año de jubilación identificado en el nombre del mismo. Cada fondo está compuesto por una combinación de acciones y bonos. Como se muestra en la siguiente gráfica, la combinación se redistribuirá automáticamente con el tiempo a medida que se aproxima la fecha objetivo del fondo, y continuará cambiando de clases de activos aún después de la fecha objetivo.

■ Renta fija/Bonos ■ Renta variable/Acciones

Estos modelos de asignación de activos se ofrecen únicamente con fines ilustrativos. Los fondos con objetivo de fecha (también llamados fondos con fecha de jubilación o fondos Lifestyle) están estructurados en base al año en que el inversionista comenzará a retirar fondos para su jubilación u otros fines. Los fondos con objetivo de fecha están sujetos a los riesgos de los fondos que los componen y la asignación de activos puede cambiar con el tiempo de acuerdo con el prospecto de cada fondo. La inversión o el rendimiento de una cartera con fondos con objetivo de fecha no está garantizado, ni siquiera para la fecha objetivo del fondo o después de la misma. Una inversión en fondos con objetivo de fecha no elimina la necesidad de que el inversionista deba decidir (antes de invertir y periódicamente después) si esta cartera de inversiones es apta para su situación económica. En el prospecto del fondo se encontrará más información.

- Cantidad mínima del préstamo: \$1000.00
- Período máximo para pagar: Generalmente 5 años, a menos que se trate de la compra de su vivienda principal.

FELICIDADES POR TOMAR EL PRIMER PASO PARA INVERTIR EN SU FUTURO Y JUBILACIÓN. UNA VEZ INSCRITO EN EL PLAN, USTED PODRÁ HACER USO DE VARIAS OPCIONES:

Save Smart®

Esta opción que ofrece el plan le permite aumentar el porcentaje de aporte a su plan de jubilación automáticamente. Puede elegir un aumento del 1%, 2% o 3% de su aporte antes de impuestos. El aumento se llevará a cabo anualmente en la fecha que usted elija.

Debe evaluar su capacidad de ahorro tomando en cuenta una caída prolongada del mercado, gastos inesperados o una emergencia impredecible.

Redistribución automática en la cuenta

Esto le permite mantener la combinación actual de inversiones (según el fondo elegido) de manera coherente con su estrategia de inversión para los nuevos aportes que realice al plan. Una vez que elija una asignación de inversiones para los nuevos aportes, la opción de Redistribución automática reequilibrará su cuenta según sus preferencias y lo hará trimestralmente, semestralmente o anualmente.

Recuerde que al redistribuir los fondos o desprenderse de una inversión con el mercado en baja significa absorber las pérdidas.

* *The Morningstar Category classifies a fund based on its investment style as measured by underlying portfolio holdings (portfolio statistics and compositions over the past three years). If the fund is new and has no portfolio, Morningstar estimates where it will fall before assigning a more permanent category. When necessary, Morningstar may change a category assignment based on current information. Morningstar Associates, LLC has designated the Specific Fund Category for each mutual fund. The Specific Fund Category for any non-mutual fund has been obtained from the fund or one if its affiliates (if they have provided one). The Specific Fund Category identifies Funds based on their actual investment styles as measured by their underlying portfolio holdings (portfolio statistics and compositions over the past three years). CITs are not tracked in the Morningstar database and are non-publicly traded mutual funds. They are a vehicle in which assets of qualified plans, generally sponsored by unrelated employers, are pooled for investment purposes. These funds are typically managed by trust departments of banking institutions.

** *** QTR End or Quarter-end returns are for the most recent quarter-end performance. The periods are 3/31, 6/30, 9/30 and 12/31.

+ An expense ratio is a fund's annual operating expenses expressed as a percentage of average net assets and includes management fees, administrative fees, and any marketing and distribution fees. Waivers or reimbursements, if any, are contractual and the fee represents the fund's annualized aggregate asset charges based on the fund's investment in underlying funds as disclosed in the current prospectus. Expense ratios directly reduce returns to investors. The expense ratio typically includes the following types of fees: accounting, administrator, advisor, auditor, board of directors, custodial, distribution (12b-1), legal, organizational, professional, registration, shareholder reporting, sub-advisor, and transfer agency. The expense ratio does not reflect the fund's brokerage costs or any investor sales charges. For publicly traded mutual funds, the net prospectus expense ratio is collected from the fund's most recent prospectus and provided by Morningstar. This is the percentage of fund assets paid for operating expenses and management fees. In contrast to the net expense ratio, the gross expense ratio does not reflect any fee waivers in effect during the time period. Morningstar pulls the prospectus gross expense ratio from the fund's most recent prospectus. CITs expense ratios are provided by the investment managers.

Investment Risks

All investments involve risk. For more complete information about the specific risks associated with the investments in the Plan, please refer to the fund's prospectus or the CIs information statement.

Fixed Income Funds: Bonds and other debt obligations are affected by changes in interest rates and the creditworthiness of their issuers. High-yield, low rated (junk) bonds generally have greater price swings and greater default risks.

Money Market/Stable Value Funds: You could lose money by investing in the Money Market/Stable Value fund. Although the fund seeks to preserve the value of your investment at \$1.00 per share, it cannot guarantee it will do so. The fund may impose a fee upon sale of the shares or may temporarily suspend your ability to sell the shares if the fund's liquidity falls below required minimums because of market conditions or other factors. An investment in the fund is not insured or guaranteed by the Federal Deposit Insurance Corporation (FDIC) or any other government agency. The fund's sponsor has no legal obligation to provide financial support to the fund, and you should not expect that the sponsor will provide financial support to the fund at any time.

Bond Funds: The value of bonds changes in response to changes in economic conditions, interest rates, and the creditworthiness of individual issuers. Bonds can lose value as interest rates rise, and an investor can lose principal. Bonds and other debt obligations are affected by changes in interest rates and the creditworthiness of their issuers. High-yield, low rated (junk) bonds generally have greater price swings and greater default risks.

Growth Funds: Growth Style Risk- over time, a growth investing style may go in and out of favor causing the fund to sometimes underperform other equity funds that use different investing styles.

Value Funds: Value Style Risk- value investing style may go in and out of favor causing the fund to sometimes underperform other equity funds that use different investing styles.

Mid and Small Cap Funds: Mid Cap risk-stocks of mid-cap companies may be more volatile and less liquid than larger company stocks. Investing in micro and small companies involves greater risks not associated with investing in more established companies, such as business risk, significant stock price fluctuations and illiquidity.

Target Date Funds: Target Date Funds (also called Retirement Date Funds, or Lifestyle Funds) are designed to target a year in which an investor could begin to withdraw funds for retirement or other purposes. Investments in target date funds are subject to the risks of their underlying funds, and asset allocations are subject to change over time in accordance with each fund's prospectus. An investment in or retirement income from a target date portfolio is not guaranteed at any time, including on or after the target date. An investment in a target date portfolio does not eliminate the need for investors to decide — before investing and periodically thereafter — whether the portfolio fits their financial situation. For more information, please refer to the prospectus, Declaration of Trust or other disclosure information.

Foreign/World Funds: Foreign investments involve greater risks and potential rewards than US investments, and investment return and principal value of the fund will fluctuate with market conditions, currencies, and economic, social and political climates of the countries where the fund invests. Emerging markets involve heightened risks related to the same factors, in addition to those associated with their relatively small size and lesser liquidity.

Sector Funds: Sector investment options may be more susceptible to factors affecting their sector and more volatile than those that invest in many different sectors. The S&P 500 Index is an unmanaged index containing common stocks of 500 industrial, transportation, utility and financial companies, regarded as generally representative of the U.S. stock market. Although it is not possible to invest in an index, sector funds are designed to track a given index that may be available to an investor.

Please keep in mind that mutual fund shares are not insured by the FDIC. Not deposits or obligations of the institution and are not guaranteed by the institution. Subject to investment risks, including possible loss of the principal amount invested. **All investments involve risk, including loss of principal, and there is no guarantee of profits. Investors should carefully consider their objectives, risk tolerance, and time horizon before investing. There is no assurance that any fund will meet its stated objective.**
